EVOcharge

SWISS MADE 

**Fresh taste and
ultimate thirst quencher**

Patented system to ensure maximum bioavailability

EVOcharge rotates water 2,000 times per minute to ensure maximum drinking pleasure. The rotational force creates a pool of oscillating, same-direction water particles, which is called coherence domain.

As a result, water clusters become smaller, extending the inner surface of water, which increases its solving power and natural vitality. Conditioned water is absorbed by your body's cells directly. Thus, EVOcharge makes sure that you get hydrated in no time.

Another advantage is the improvement of water taste following conditioning. EVOcharge makes it taste lighter and easier to digest.

Based on our patented rotational system, EVOcharge ensures soft and oxygen-rich water that is readily available to cells.

Operating principle

EVOcharge is based on our rotational system

EVOcharge's unique algorithm and specifically designed geometry ensure the best possible treatment of incoming water.

The force of directly entering EVOcharge puts water into circulation through rotary nozzles so that it flows on its own making some 2,000 rotations per minute. This has an unusual and astonishing effect on the water.

EVOcharge's high-quality performance is based on scientifically provable effects, such as Bernoulli, Piezo, Dollop and Lenard effects, and physical forces, such as Lorentz and magneto-hydrodynamic forces.

Inspired by nature – developed for you

Water molecules consist of one oxygen atom and two hydrogen atoms (H₂O). The relationship between these two atoms gives water a unique electrical polarity. Accordingly, water is capable of binding its molecules together, which is called water structure (clustering).

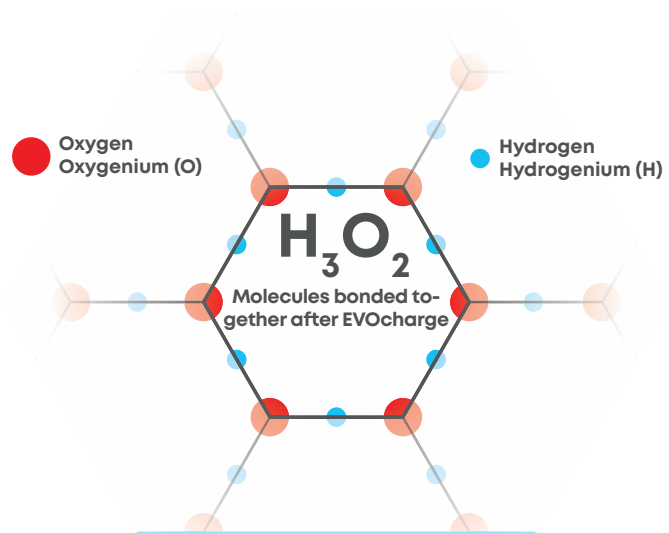

Due to municipal water treatment and the related pressure our tap water is continuously exposed to, it comes in very large clusters, which bind to contaminants and other foreign substances.

The strong rotational force exerted on water in EVOcharge helps us reduce the so-called water clusters. Thus, the hydrogen/oxygen ratio is optimised, producing H₃O₂. This effect occurs in nature when water breaks its way through miles and miles of stream beds.

H₃O₂ for the best hydration

Why H₃O₂?

Approx. 70% of your body is made up of water, 60% of which can be found in cells (intracellular) and 40% of which outside cells (extracellular). Intracellular water is by far more important for humans as it is responsible, among other things, for metabolism and energy production. Besides, loss of intracellular water results in wrinkles and speeds up the ageing process.

Hydrogen (H)	 $1/2 \times 6 = 3$
Oxygen (O)	 $1/3 \times 6 = 2$

Hydrogen	$3 \times (+1) = +3$
Oxygen	$2 \times (-2) = -4$
Total charge	-1

H₃O₂ is a coherent structure of water. Studies conducted by Nobel Prize winners Peter Agre and Roderick MacKinnon have shown that this is exactly how intracellular water is structured inside human cells.

Due to EVOcharge's innovative system of rotation, water assumes this coherent structure, providing cells with required H₃O₂, which is negatively loaded, and thus delivering energy to your body.

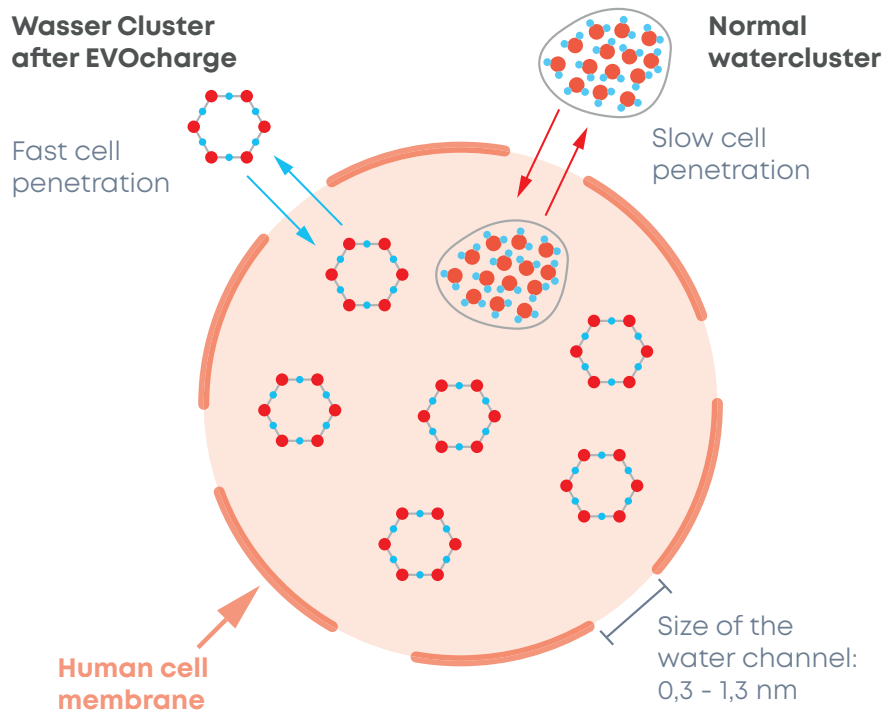

Conditioned water can be processed by your body faster and more efficiently. Better hydration also means more health and energy!

we are water

Scientifically tested and repeatedly proven

With the help of LifeVisionLab in Zurich (Dr Zina Palic), Water Research Foundation (Dr Everine van de Kraats), Institut Dartsch Scientific GmbH (Professor Peter Dartsch) and Scientific Research Centre of Medical Biophysics (Professor Ignat Ignatov), we have managed to prove, among other things, the following:

- **Stable coherent structure (H3O2)**
- **Faster cell hydration**
- **Enhanced metabolic functions**
- **Anti-inflammatory properties**
- **Improved cell regeneration**
- **Reduced cell degeneration**
- **Surplus of electrons in water**

Your everyday benefits

Optimal thirst quencher

Smaller water clusters (bonded molecules) can permeate the cell membrane more easily, letting water get into cells quicker.

Fortify your immune system

Water becomes more conductive, which, above all, helps detoxify your body. Thus, your immune system and that of your family are strengthened.

Maximum bioavailability

The coherent structure of water after EVOcharge makes it possible for nutrients to be optimally absorbed in the body (bioavailability).

Better feeling of thirst

As you get quickly hydrated, you also feel thirst better. our body responds to conditioned water extremely well, and drinking two litres of water a day is no longer a problem for you.

Energy boost

Water is the most efficient source of energy in the world – EVOcharge increases the flowing and dissolving properties of water, supporting all major metabolic processes of your body

Full of fragrance

The increased dissolving power and improved structure of water significantly add to the original taste of food. Tea and coffee release their full flavour potential and cooking makes food taste stronger.

Soft taste

Water obtains a light and soft taste, becoming easy to digest. It does not sit heavily on your stomach, and provides a soothing refreshment.

Maintenance

EVOcharge does not need electricity or any other energy to operate. Made from materials resistant to corrosion and erosion, EVOcharge requires absolutely no upkeep or maintenance.

SWISS MADE

We manufacture EVOcharge entirely in Switzerland, using only top-quality materials. We warrant this quality for ten years.

Note

If you would like to make full use of EVOcharge's potential, water should be free of any contaminants and foreign substances. For this purpose, we recommend installing EVOdrink before EVOcharge.

drink plus
you save **CHF 300**

- + EVOdrink – drinking water filter
- + EVOcharge – Water conditioner
- + EVObooster – hydrogen

CHF 3,950 ~~4'250 CHF~~

To enjoy the purest and healthiest drinking water with the highest bioavailability and molecular hydrogen for your body, we recommend our «drink plus» bundle package.

Our all-round care-free package for optimally treated drinking water.

drink basic

- + EVOdrink - drinking water filter

CHF 2,400

drink kombi

- + EVOdrink - drinking water filter
- + EVOcharge - Water conditioner

CHF 2,950
